# 1. Recording

Wednesday, October 03, 2012  
3:27 AM

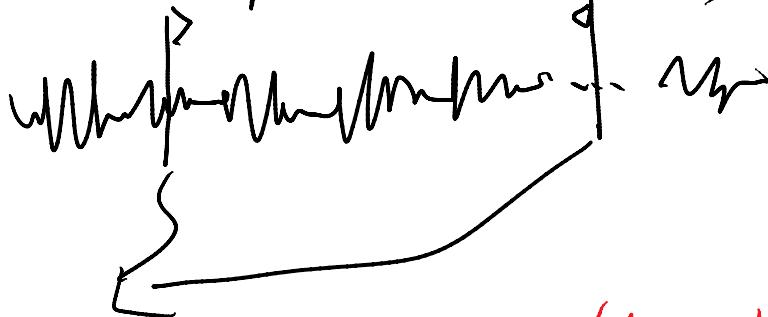

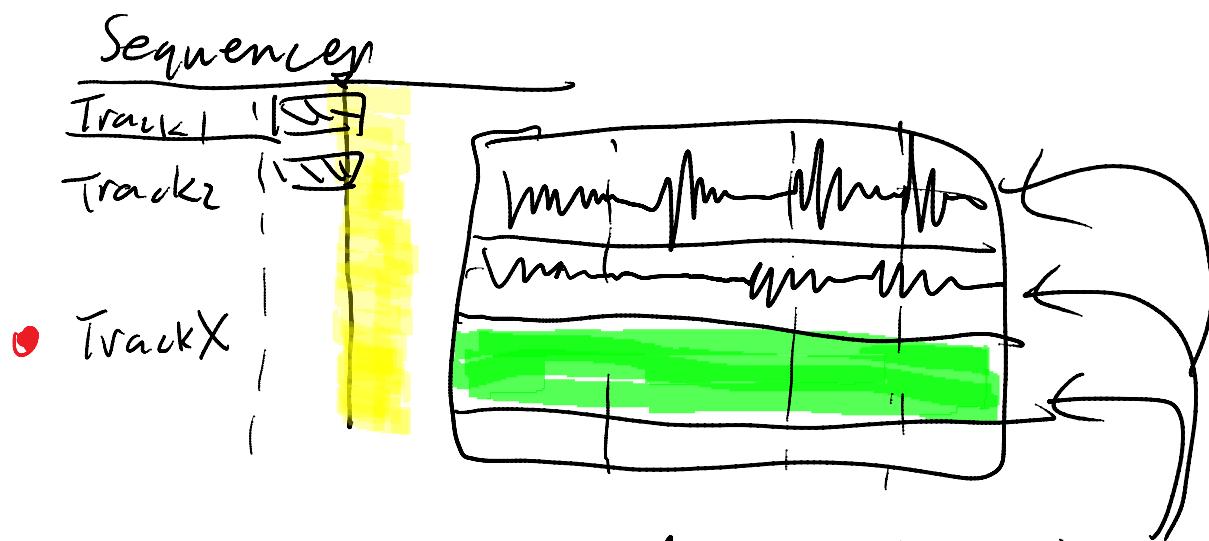

- One-Shot rec & stop keeps recording,
- Or "Overwrite" The unit is set in so that after recording,
- Or Dubbing

Also, this one will create

One can select easily from history (by selecting bars), instead of . . .

"variations".  
Think about  
recording all  
variations for  
a drum track,  
and split and  
reuse easily.

selecting in ...  
(Here Abxxxn Lxxe)  
  
I hate dragging these!!

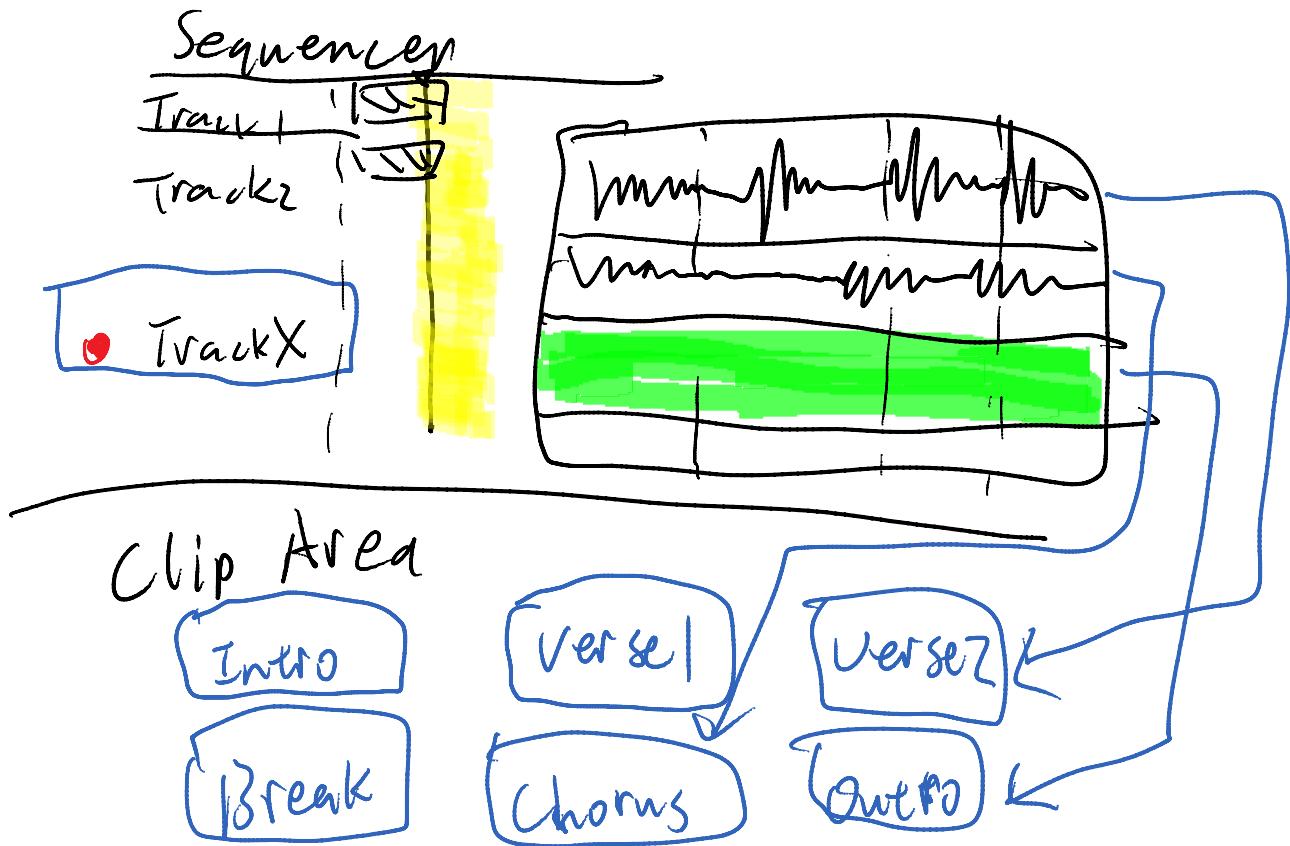

If this is a drum track,  
user can store every piece  
(e.g. 4 bars per unit) and  
reuse them.

## 2. Arrangement

Wednesday, October 03, 2012

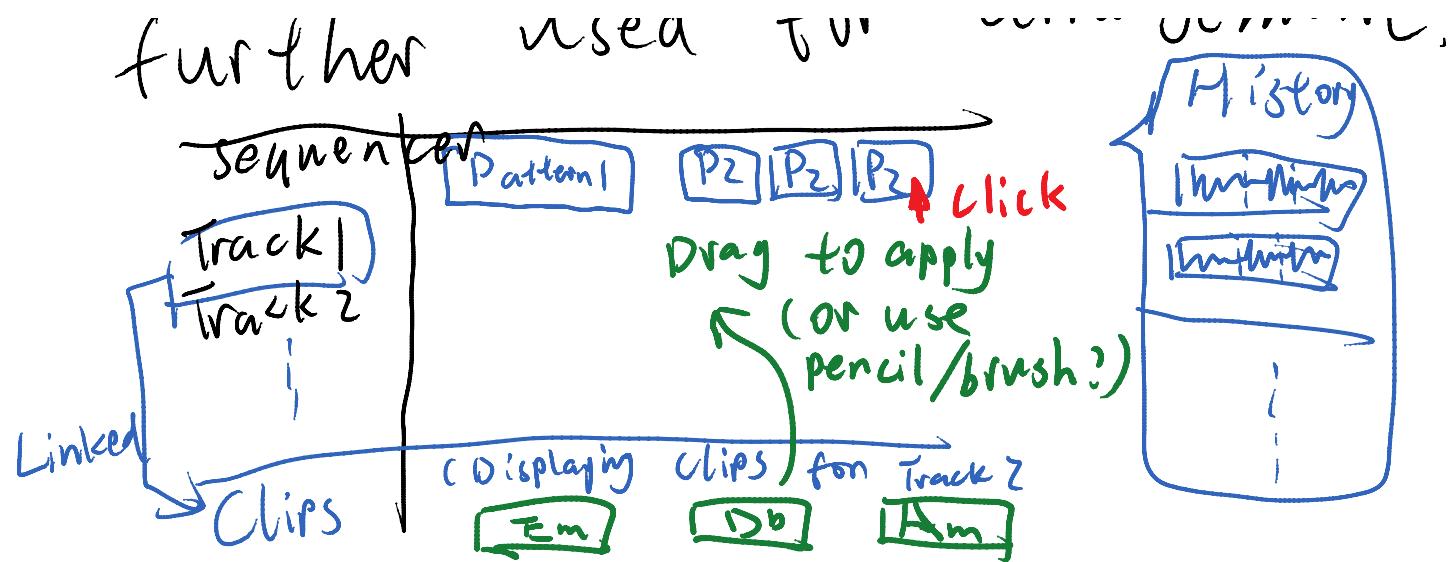

3:30 AM

When recording is done, one can assign the history to "clips" (like midi patterns)

These clips can then be further used for arrangement.

✓ History

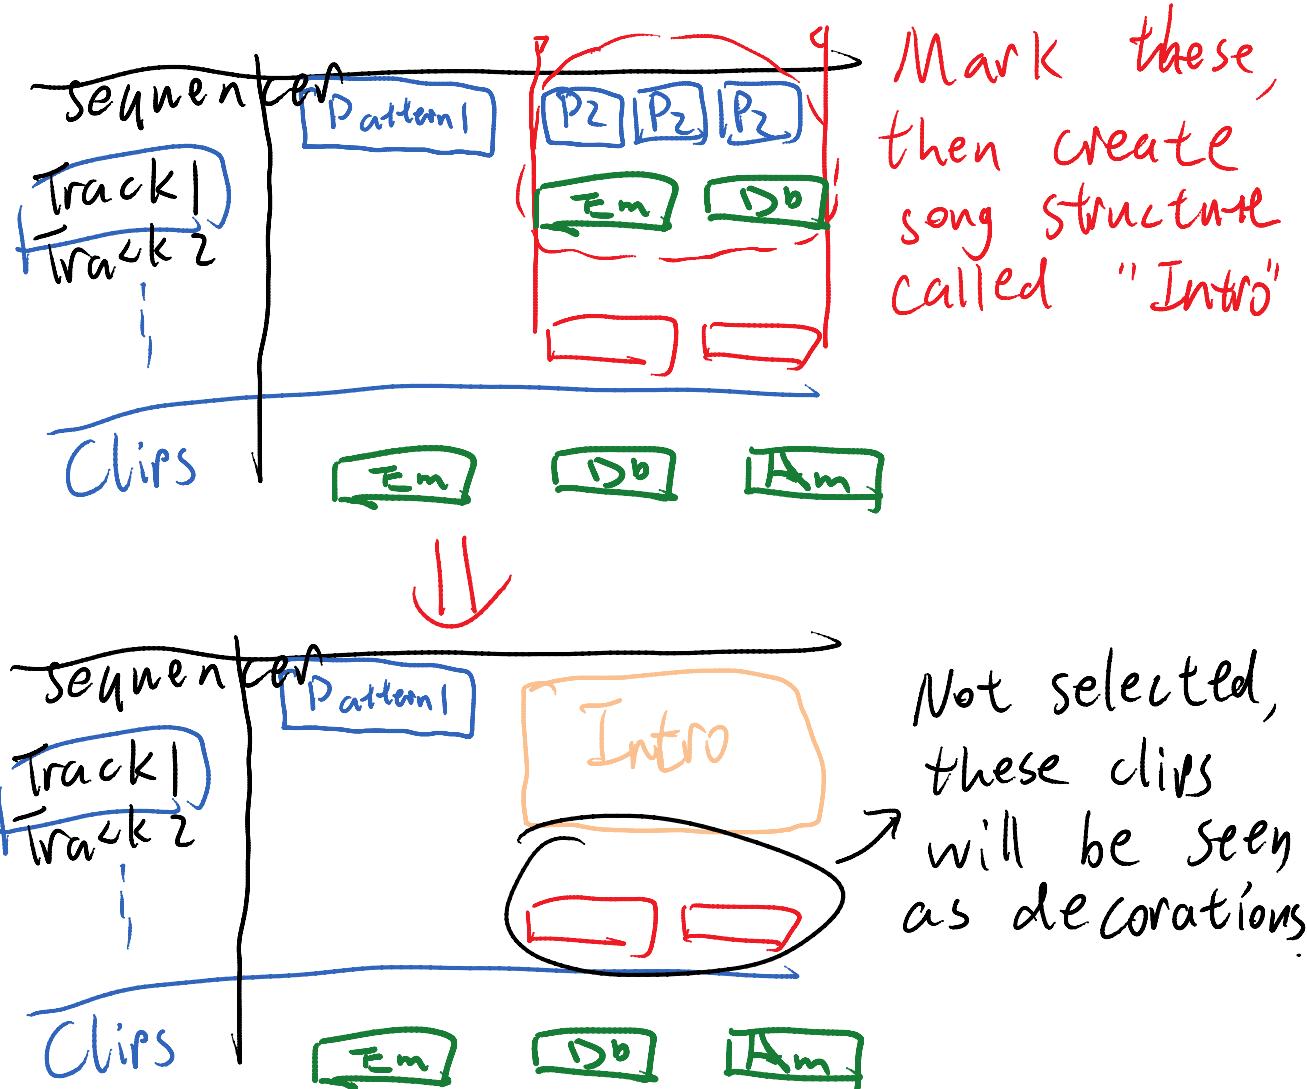

\* Also, clicking on the clip in sequencer can bring up the recording history.

### 3. Song Structure

Wednesday, October 03, 2012

3:34 AM

- One can select a whole song structure, copy, paste, or make unique.

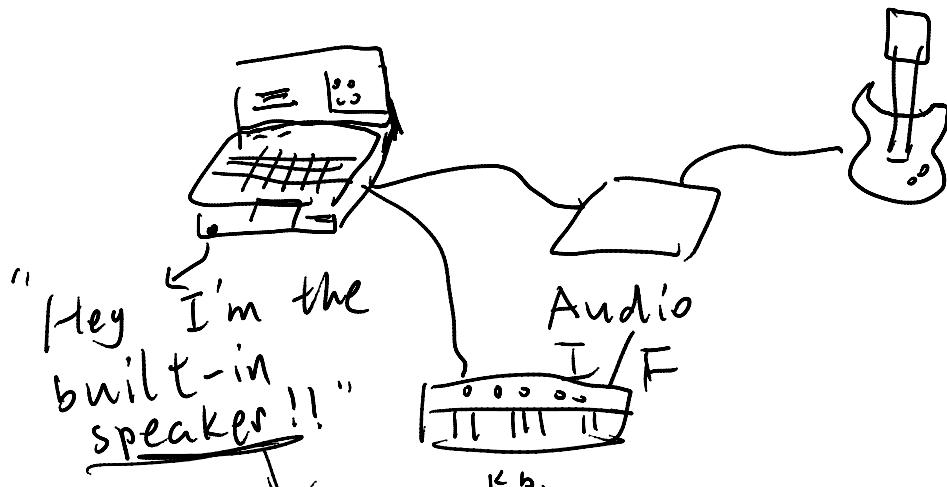

Inspired by FL studio  
Also applies to clips.

## 4. Rapid Control

Wednesday, October 03, 2012

3:44 AM

- A typical mobile workstation:

- Voice Control

- Select Track X
- Go to Intro
- (Recording) "Drop this sxt!!"
- (Initiate a record) 1, 2, 3, 4
- Stop !

- Mapping mode

- Okay,  $cmap$ ,  $smap$ ,  $rmap$   
 $(clip)$        $(sequencer)$        $(record)$

(... nmap <C-F5> :!make <CR> :D)

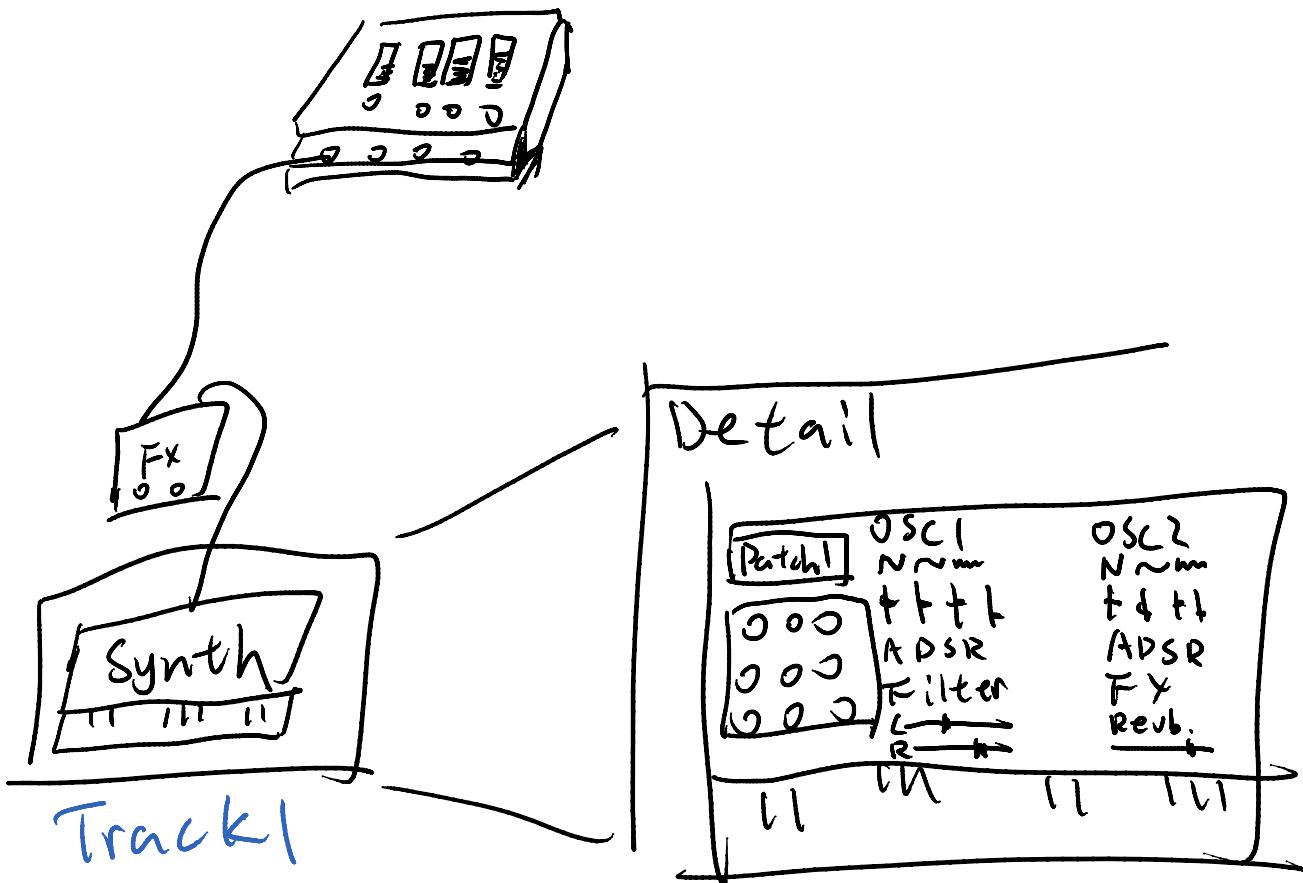

- Map 4 muted guitar strings to "Start recording" would be super cool
- ( x , x , x , x , Em ... D ... )  
→ Start !! x x )
- Maybe use google API for voice?

## 5. Instruments, Devices

Wednesday, October 03, 2012

3:58 AM

### Studio

- A Free Space to put devices
- Clicking a device to go to details.

## 6. Inspiration Time

Wednesday, October 03, 2012

4:04 AM

- Go into Free-Run mode  
(recording & splitting all the way)
- Recognition in real time, so that....
- Automatically plays other tracks  
that best fit the current performance.
